SUMMARY

Aspiring Software Developer driven by curiosity and hands-on project experience in front-end and back-end development. Enjoys building user-friendly applications, integrating APIs, and working with databases. Always eager to learn new tools, improve coding practices, and grow as a valuable team contributor.

EDUCATION

Masters of computer application, Chandigarh University Gharaun,Punjab — Aug'23 — June'25

Bachelor of computer application, Kurukshetra University Kurukshetra,Haryana — July'19 —May'22

Intermediate in , P.D.V.M Sr.Sec.School Panipat, Haryana — Apr'18 —May'19

Matriculation in , P.D.V.M Sr.Sec.School Panipat,Haryana — Apr '17 — Mar'18

EXPERIENCE

JAY PAY IT SOLUTION PRIVATE LIMITED. – Web Developer Intern (1 Year)

Assisted in the development of dynamic and responsive web applications using modern front-end and back-end technologies. Contributed to building intuitive user interfaces, optimizing performance across devices, and integrating APIs to deliver seamless functionality. Collaborated with senior developers in troubleshooting, feature implementation, and code reviews, gaining hands-on experience with best practices in professional web development and agile methodologies.

ALGONIVE- React Developer(2 Months)

Web Developer Intern at Algonive, contributing to the development of responsive and scalable web applications using modern technologies such as React, Firebase, and JavaScript. Worked on real-world projects where I implemented features like user authentication, form handling, and API integration while ensuring smooth user experience. Focused on optimizing performance and improving UI/UX design, while collaborating with the team to deliver efficient, reliable, and user-friendly solutions.

PROJECTS

Chat Application | Live Demo**:** https://batcheet2.vercel.app/

- Developed a real-time chat application with secure authentication using email/password and Google Sign-In.
- Built a responsive and user-friendly interface using HTML, CSS, JavaScript, and React.
- Implemented real-time messaging and data synchronization using Firebase for seamless communication.
- Designed features similar to modern messaging platforms (e.g., WhatsApp) for enhanced user experience.
- Optimized application performance and ensured scalability across multiple devices.
- Followed clean code practices and modular design for maintainability and efficiency.

React Portfolio Website

- A personal portfolio website built using React to showcase my web development projects, skills, and experience. The site features responsive design, smooth navigation, and detailed project sections, and serves as a dynamic resume to demonstrate front-end proficiency and design sensibility.
- Tech Stack: HTML, CSS, JavaScript,React
- Live Link**:** https://harshsharmadev.netlify.app/

Spotify Clone

- Basically It s a dynamic and feature-rich web application designed to replicate the core functionalities if Spotify,one of the most popular music streaming platforms in the World.This project serves as a hands-on implementation of modern web technologies,offering a seamless user experience for exploring,discovering ,and enjoying music.

Car Rental

- A **Car Rental Website** is a full-featured web application designed to provide a seamless and efficient car rental experience. Built using **HTML,CSS JS, REACT,NODEJS AND EXPRESSJS** this platform allows users to browse and book cars effortlessly while enabling administrators to manage listings, bookings, and payments. The frontend, developed with **React**, ensures a responsive and dynamic user interface, while the backend, powered by **Node.js and Express.js**, handles authentication, booking logic, and data processing. The database, managed with **Sql**, stores user information, car details, and rental transactions securely. Users can search for available cars using filters, make secure bookings with **JWT-based authentication**, and process payments through **Stripe or PayPal**. This **Car Rental Website** offers a modern, user-friendly, and secure solution for businesses looking to digitize their car rental services while providing customers with a hassle-free online booking experience.

SKILLS

Programming Languages: HTML, CSS , JAVASCRIPT , C++ , React JS, NODEJS , EXPRESS , SQL
Frameworks: Bootstrap,
Library: React Js,
Development Tools: Visual Studio, GitHub, Cursor
Problem Solving Skills: DSA, Problem Solving, Self Discipline
Communication Skills: Communication, Team and Collaboration

CERTIFICATIONS

- Basic CSharp programming(11/2023)Infosys Springboard
- Introduction of Data Science(3/2024) Infosys Springboard
- Angular (6/2025) Infosys Springboard
