Portfolio: harshshrma.netlify.app | LinkedIn

SUMMARY

Full-stack web developer (MCA) with hands-on experience across React, Node.js, Express and SQL, gained through three internships and several end-to-end projects, now extending products with LLM-powered AI features. Skilled at turning requirements into responsive, API-driven applications, with secure authentication (JWT, Google Sign-In), real-time data (Firebase) and payment integration. Works well in agile teams, contributing through code reviews, troubleshooting and feature delivery.

EDUCATION

MCA, Chandigarh University, Gharaun, Punjab — **Aug 2023 – Jun 2025**

BCA, Kurukshetra University, Kurukshetra, Haryana — **Jul 2019 – May 2022**

Intermediate (12th), P.D.V.M Sr. Sec. School, Panipat — **Apr 2018 – May 2019**

Matriculation (10th), P.D.V.M Sr. Sec. School, Panipat — **Apr 2017 – Mar 2018**

SKILLS

Languages	HTML, CSS, JavaScript, C++, SQL
Frontend	React.js, Bootstrap, Responsive UI/UX
AI / LLM	LLM API Integration, Prompt Engineering, AI Assistants, Serverless APIs
Backend & Data	Node.js, Express.js, SQL, Firebase (Auth, Realtime Sync), REST APIs, JWT
Tools	Git, GitHub, Visual Studio, Cursor, Stripe / PayPal integration
Core Strengths	DSA, Problem Solving, Agile Collaboration, Communication

EXPERIENCE

Web Developer Intern – Jay Pay IT Solution Pvt. Ltd. — **1 Year**

- Built dynamic, responsive web applications across front-end and back-end, integrating APIs to deliver seamless functionality.
- Optimized UI performance across devices and contributed to feature implementation and troubleshooting alongside senior developers.
- Participated in code reviews and agile workflows, applying professional web development best practices.

React Developer Intern – Algonive — **2 Months**

- Developed responsive, scalable web applications using React, Firebase and JavaScript on real-world projects.
- Implemented user authentication, form handling and API integration while improving performance and UI/UX.

PROJECTS

Chat Application | Live Demo | *React, Firebase, LLM API, Vercel*

- Built a real-time chat app with email/password and Google Sign-In authentication.
- Implemented real-time messaging and data sync using Firebase, with a WhatsApp-style, responsive interface.
- Extended the app with an LLM-powered assistant (chat summaries, smart reply suggestions, in-chat Q&A), planning and shipping the feature end-to-end.
- Integrated the model through a secure Vercel serverless API so keys stay server-side, keeping the existing React and Firebase architecture unchanged.

Car Rental Platform | *React, Node.js, Express.js, SQL, JWT, Stripe/PayPal*

- Full-stack rental platform: users search cars with filters and book securely; admins manage listings, bookings and payments.
- Built the React front-end and a Node/Express back-end for authentication (JWT), booking logic and SQL-backed data storage.

React Portfolio Website | Live Link | *HTML, CSS, JavaScript, React*

- Responsive portfolio with smooth navigation and detailed project sections showcasing front-end work.

Spotify Clone | *Web Application*

- Recreated core Spotify music-streaming functionality to practice modern web technologies and UX for browsing and playing music.

CERTIFICATIONS

- Angular (Jun 2025) – Infosys Springboard
- Introduction to Data Science (Mar 2024) – Infosys Springboard
- Basic C# Programming (Nov 2023) – Infosys Springboard
